Open Knowledge
Foundation

The gray area of the Web

Legal for reuse

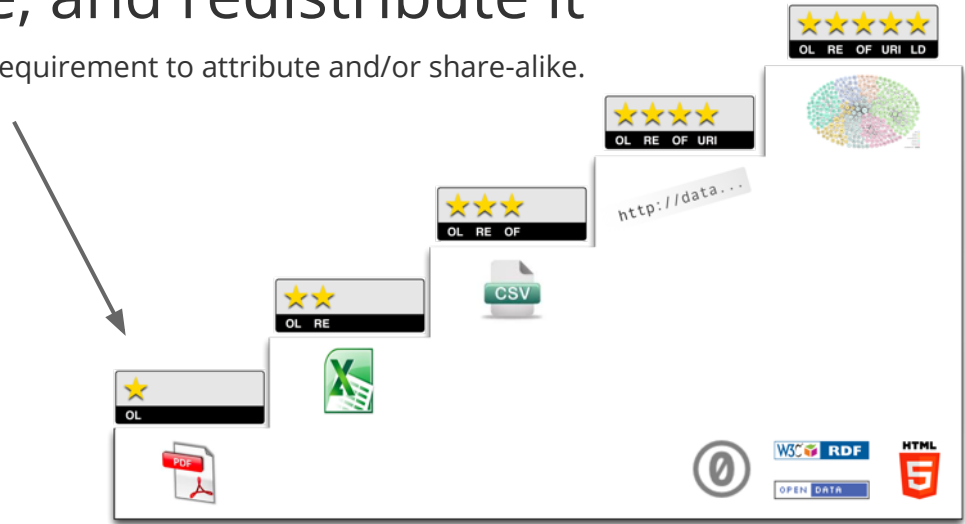

Put your data in the white area

Open Definition.org

A dataset is open if anyone is free to use, reuse, and redistribute it

— subject only, at most, to the requirement to attribute and/or share-alike.

Why would data owners do that?

Be the authoritative source

Free apps

Because they have to

Feedback → data quality ↑

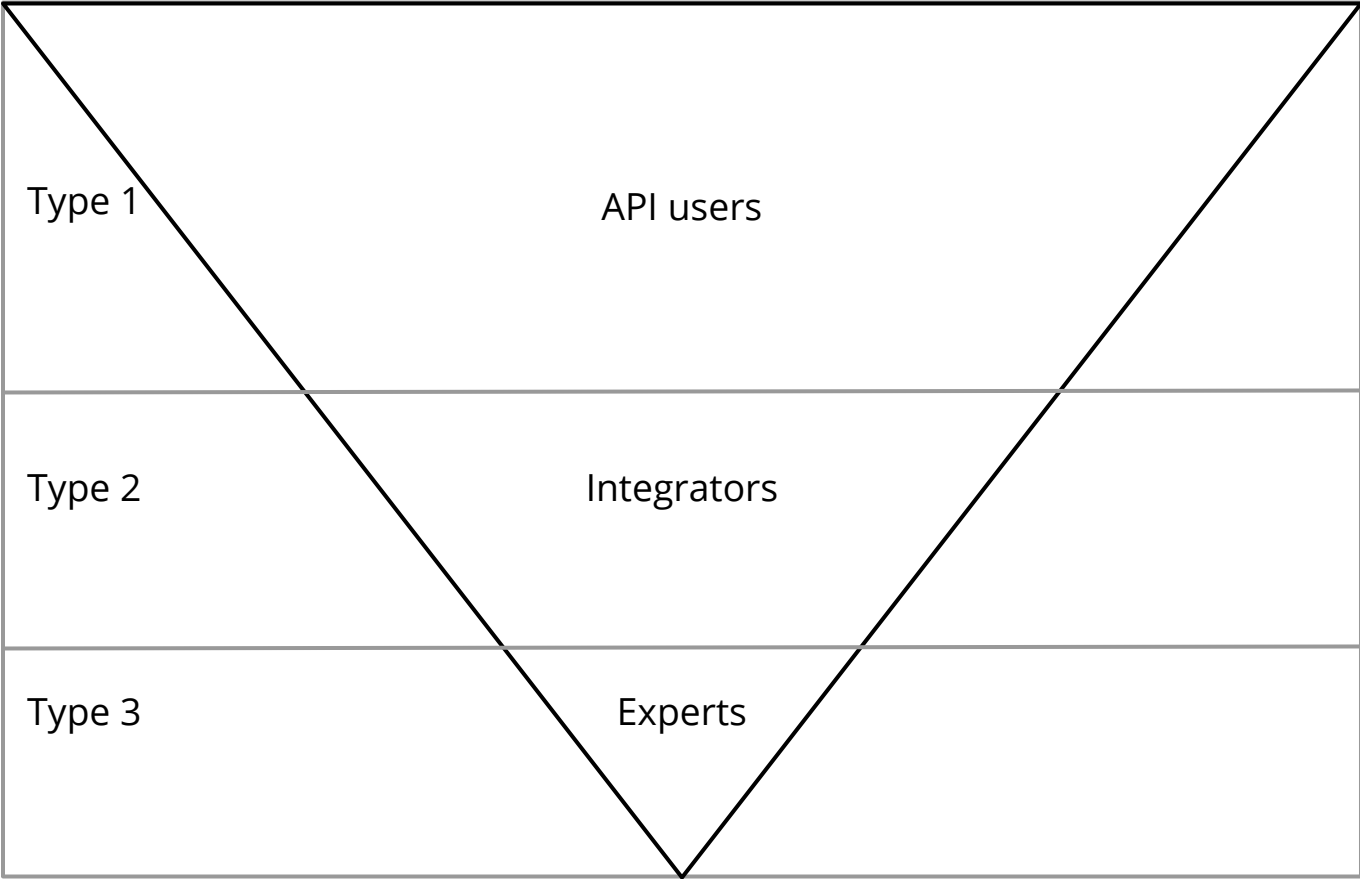

...

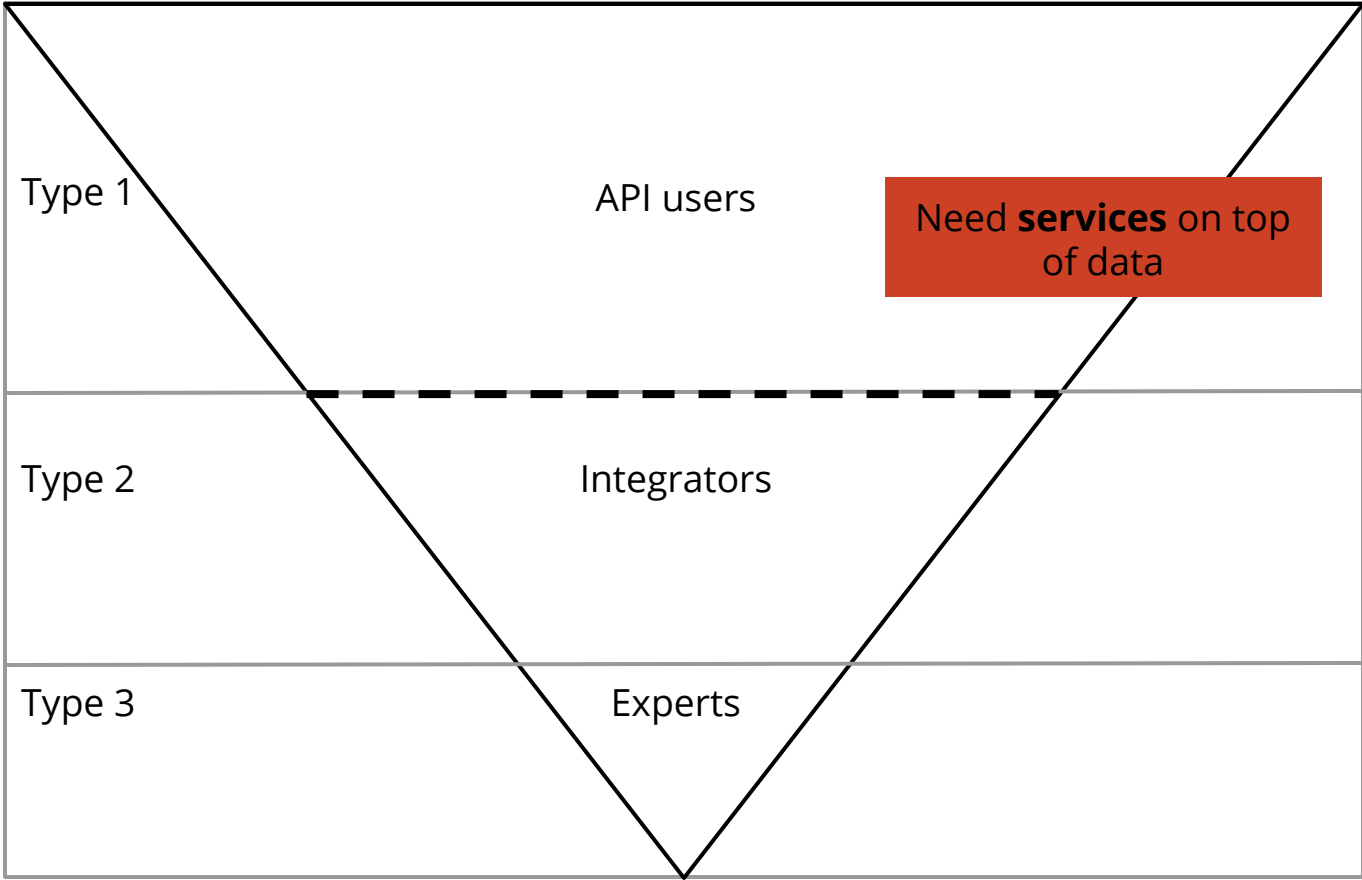

Why would data owners do that?

Data owners are confused

Create an API or publish Open Data?

Type 1

API users

Need **services** on top of data

Type 2

Integrators

Type 3

Experts

COGNITIVE PSYCHOLOGY

How Language Shapes Thought

The languages we speak affect our perceptions of the world

By Lera Boroditsky

Lera Boroditsky is an assistant professor of cognitive psychology at Stanford University and editor in chief of *Frontiers in Cultural Psychology*. Her lab conducts research around the world, focusing on mental representation and the effects of language on cognition.

Data vs. Services

Data publishing

Data services

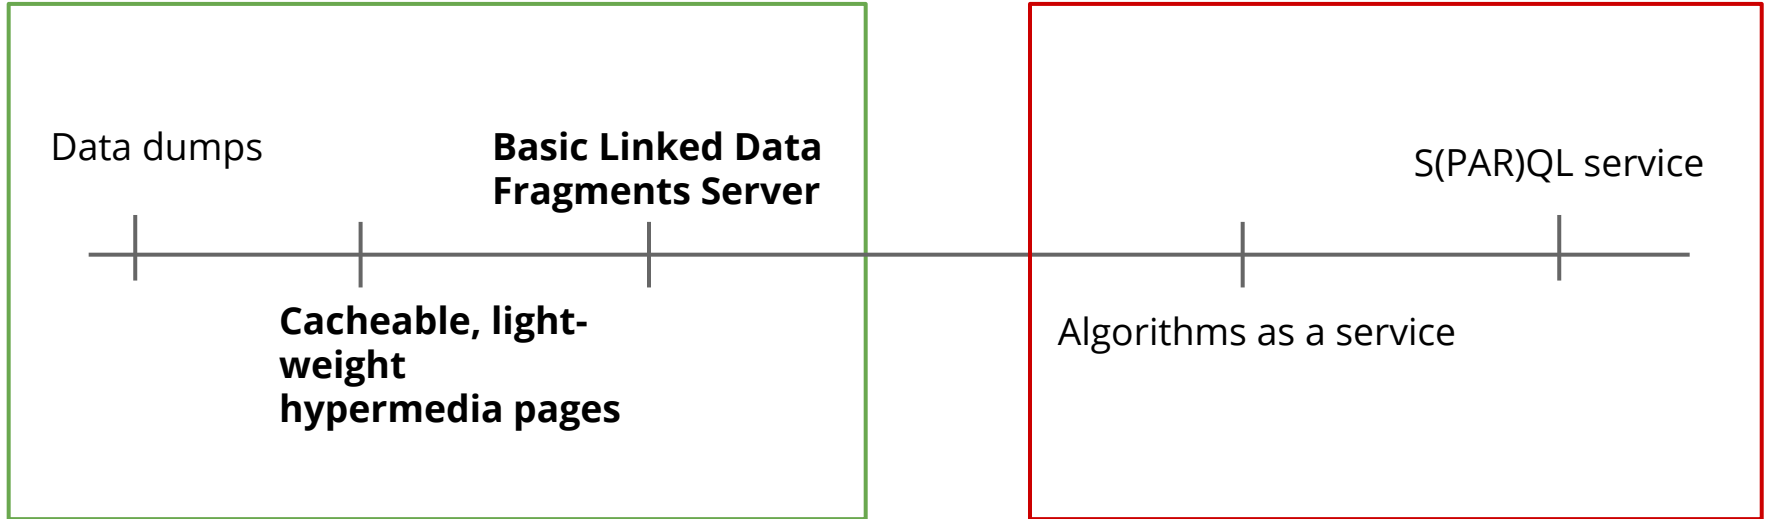

Data dumps

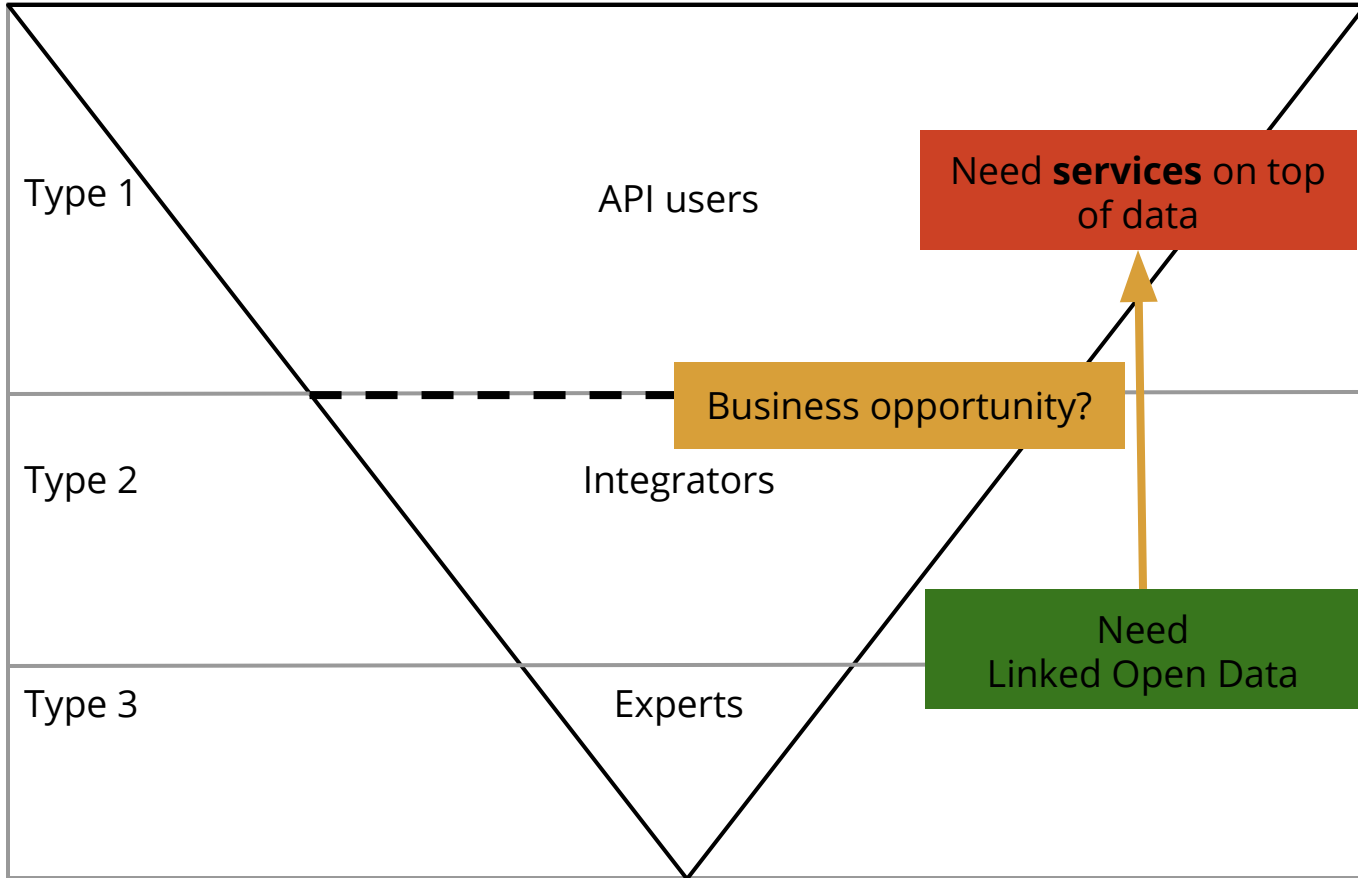

**Basic Linked Data
Fragments Server**

S(PAR)QL service

**Cacheable, light-
weight
hypermedia pages**

Algorithms as a service

What can we do?

Ask for **openly licensed** data

Ask for **data**, not services

When in a 5-star data project, set up light-weight data publishing software
